Portfolio: <https://port2-folio.netlify.app/> GitHub: <https://github.com/Ayomidejhay>

Professional Summary

Results driven Frontend Web Developer with strong hands-on experience designing and building scalable, high-performance web applications and landing pages using React, Next.js, TypeScript, and Tailwind CSS. Proven ability to translate product requirements and UI designs into clean, maintainable, and production-ready code across freelance, contract, and internship engagements. Experienced in implementing authentication, role-based access control, API integrations, and performance optimizations using modern tooling such as Supabase and RESTful services. Adept at collaborating with cross-functional teams, delivering business-aligned solutions, and continuously improving user experience, accessibility, and application reliability.

Education

Federal University of Technology, Akure

Bachelor of Technology (B.Tech) in Computer Science

Jan 2020 – Sep 2025

Second Class Upper

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Bootstrap
- UI & Animation: ShadCN UI, Framer Motion, GSAP
- Backend & APIs: Supabase, REST APIs, Authentication, RLS
- Tools: Git, GitHub, Responsive Design, SEO Optimization

Professional Experience

Freelance Frontend Developer

Remote | July 2023 – Present

- Built responsive websites, dashboards, and landing pages for startups and small businesses using React, Next.js, and Tailwind CSS.
- Developed reusable components and design systems to improve development speed and UI consistency.
- Integrated authentication, database access, and API-driven features using modern backend services.
- Optimized web applications for performance, accessibility, and SEO.
- Worked directly with clients to gather requirements and deliver tailored technical solutions.

Frontend Developer (Contract)

Rehobot Business Solution Ltd | Remote

- Worked as a contract frontend developer delivering business-oriented web solutions for client-facing and internal products.
- Designed and implemented responsive, conversion-focused user interfaces using Next.js and Tailwind CSS.
- Built and maintained an internal admin dashboard featuring role-based access, protected routes, and reusable UI components.
- Integrated backend services and APIs to support data management, authentication flows, and dashboard interactions.
- Optimized application performance and ensured cross-device compatibility with a mobile-first approach.
- Collaborated with stakeholders to translate business requirements into scalable, maintainable frontend implementations.

Frontend Developer Intern

DotCircle Labs | Jan 2024 – Jun 2024

- Developed and maintained frontend components for internal and client dashboards using React and Tailwind CSS.
- Built responsive landing pages and admin panels integrated with backend services.
- Implemented role-based authentication and authorization using Supabase Row-Level Security (RLS).
- Collaborated with designers and backend engineers to ship production-ready features.

Projects

Runnars Landing Page

Stack: Next.js, TypeScript, Tailwind CSS

- Designed and developed a high-conversion, responsive landing page for a business brand while working at Rehobot Business Solution Ltd.
- Implemented a mobile-first layout, reusable UI components, and optimized assets for performance.
- Collaborated with business stakeholders to align UI delivery with branding and marketing goals.

Live site: <https://www.runnars.com/>

JobConnect Platform

Stack: Next.js, TypeScript, Supabase, ShadCN UI

- Developed a full-featured job-sharing platform enabling authenticated users to post, manage, and browse job listings.
- Implemented Supabase Row-Level Security (RLS) to enforce role-based access control and secure job data
- Built reusable form components, validation logic, and protected routes.

Live Demo: <https://jobconnnect.netlify.app/>

Degen Cyberlab Landing Page

Stack: Next.js, TypeScript, Tailwind CSS, Framer Motion

- Designed and developed a modern landing page for a cybersecurity education platform.
- Focused on brand consistency, accessibility, and smooth animations using Framer Motion.
- Optimized layout for mobile, tablet, and desktop experiences.

Live Demo: <https://cyberr-lab.netlify.app/>

ZeroHunger

Stack: Next.js, TypeScript, Supabase, ShadCN UI, Tailwind CSS

- Built a food donation platform connecting donors with recipients to reduce food waste.
- Implemented real-time listing updates, donation reservations, and pickup tracking workflows.
- Applied Supabase Row-Level Security (RLS) policies to ensure secure and contextual data access.
- Integrated toast notifications for critical user actions and system events.
