PROFESSIONAL SUMMARY

Detail-oriented Frontend Software Engineer with a strong academic background in Computer Science and over two years of practical experience designing, maintaining, and deploying responsive customer-facing web applications. Proficient in frontend fundamentals including JavaScript (ES6+), HTML5, and CSS3, with proven experience building stable features using React.js and Next.js frameworks. Demonstrates hands-on knowledge in integrating RESTful APIs, real-time sports/analytics feeds, orchestrating state management patterns, and implementing security best practices such as contextual data protection and secure authentication layers. Adept at working collaboratively in fast-paced, agile environments alongside Product Managers, Designers, and Backend Engineers to convert complex specifications into clean, accessible, and thoroughly tested components.

TECHNICAL SKILLS & COMPETENCIES

Core Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, Core Systems C Foundations
Frameworks & Style	React.js, Next.js (App & Pages Router), Vite Pipeline, Tailwind CSS, Bootstrap, ShadCN UI
API & Real-Time	REST APIs Consumption, Football API Integration, Supabase, Firebase (Firestore, Auth), WebSockets
UI & Motion	Radix Primitives, Responsive Web Design, Mobile-First Layouts, Framer Motion, GSAP
Security & Tooling	Row-Level Security (RLS) Policies, Browser Developer Tools, Web Performance Optimization, Git/GitHub

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer	Remote
Independent Technical Consultant	July 2023 – Present
- Develop and maintain customer-facing features for web applications and dashboards using React.js, Next.js, and TypeScript, ensuring strict cross-device rendering fidelity. - Convert abstract visual layouts and UI/UX designs into modular, responsive, and highly reusable frontend components utilizing Tailwind CSS. - Collaborate with clients and cross-functional partners to consume and integrate secure RESTful APIs, managing asynchronous state data smoothly. - Identify and resolve software bugs, layout defects, and processing issues using browser developer tools and code profiling practices. - Audit asset workflows and apply basic web performance optimization principles to enhance accessibility (a11y), search engine discovery, and view-state loading times.	

Frontend Developer (Contract)

Rehobot Business Solution Ltd

Remote

Nov 2025 – June 2026

- Contributed to the development and deployment of commercial client-facing applications and corporate management products writing clean, maintainable frontend code.
- Built an internal administrative dashboard interface implementing structured, role-based access control (RBAC), protected routes, and interactive data grid displays.
- Collaborated closely with business stakeholders, product managers, and backend engineering teams to translate structural requirements into stable user experiences.
- Utilized collaborative Git workflows, participating in engineering discussions, code formatting standardization, and system peer evaluations.
- Ensured comprehensive responsiveness by enforcing a mobile-first UI architecture, reducing user interface inconsistencies across target viewports.

Frontend Developer Intern

DotCircle Labs

Remote

Jan 2024 – June 2024

- Supported the engineering team in maintaining client dashboard interfaces and data panels using React and utility-first styling structures.
- Integrated backend microservices and REST endpoints to handle real-time user action tracking, authentication trees, and data presentation.
- Acquired hands-on exposure to frontend security best practices by setting up and testing context security layers via Supabase Row-Level Security (RLS) boundaries.
- Participated in active agile sprints, team code reviews, and cross-functional planning sessions to isolate bugs and ship verified features.

CORE TECHNICAL PROJECTS

Football Info – Next.js, TypeScript, React, Tailwind CSS, Football API, REST APIs

Sports Analytics Platform

- Developed a dynamic sports dashboard integrated with a live Football API to fetch and render real-time scores, league standings, and fixture news.
- Engineered interactive match filtering enabling users to toggle between live, scheduled, and finished matches seamlessly.
- Implemented comprehensive team statistics, lineups, and Head-to-Head (H2H) analysis views for deep pre-match and post-match insights.
- Designed and built a custom community score prediction hub allowing users to submit predictions and engage with matchday outcomes.
- Crafted a modern, dark-mode optimized interface with Tailwind CSS achieving high responsiveness and touch-friendly navigation across all devices.
- [Live System Demo: https://football.netlify.app/](https://football.netlify.app/)

Invoxa Platform – Next.js, TypeScript, Tailwind CSS, Supabase Architecture

Fintech / Invoicing SaaS

- Engineered an invoicing software application featuring hierarchical company workspace separation, ledger records, and multi-tenant isolation principles.
- Integrated automated payment/billing cron structures via secure serverless compute triggers and webhooks to update client balances dynamically.
- Wrote reusable form components backed by programmatic validation mechanisms to handle complex numeric accounting entries safely.
- [Live System Demo: https://invoxa.netlify.app/](https://invoxa.netlify.app/)

Runnars Landing Page – Next.js, TypeScript, Tailwind CSS

Marketing Infrastructure

- Designed and developed a high-conversion, responsive landing page for a business brand while working at Rehobot Business Solution Ltd.
- Implemented a mobile-first layout, reusable UI components, and optimized assets for performance while collaborating with business stakeholders.
- Live site: <https://www.runnars.com/>

ZeroHunger Hub – Next.js, TypeScript, Supabase (RLS), ShadCN UI, Tailwind CSS

Social Impact Web App

- Built an active asset reservation platform linking distribution centers, utilizing active state-listening sockets for instantaneous status updates.
- Enforced strict secure coding practices by writing Row-Level Security data filters to prevent unauthenticated client transaction manipulation.
- Live System Demo: <https://zero-hungerr.netlify.app/>

ACADEMIC BACKGROUND

Federal University of Technology, Akure
Bachelor of Technology (B.Tech) in Computer Science
Graduated with Second Class Honours (Upper Division)

Ondo State, Nigeria
Jan 2020 – Sept 2025

LANGUAGES & PROFESSIONAL ATTRIBUTES

Spoken Languages

English (Professional Proficiency), French (Conversational)

Core Soft Skills

Analytical Problem-Solving, Team-Focused Collaboration, High Attention to Detail, Iterative Adaptability, Agile Communication
